

REGULATION 2.08

Fees

Louisville Metro Air Pollution Control District

Jefferson County, Kentucky

Relates To: ~~KRS Chapter 77 Air Pollution Control~~

Pursuant To: KRS Chapter 77 Air Pollution Control ~~and 42 USC 7661a~~

Relates To: KRS 77.195 and 77.205; 42 USC 7661a

Necessity and Function: KRS Chapter 77 authorizes the Air Pollution Control Board to adopt and enforce all orders, rules, and regulations necessary or proper to accomplish the purposes of KRS Chapter 77, including establishing fees. The Clean Air Act Title V (42 USC 7661 et seq.) requires the assessment of emissions fees necessary to operate the Title V-required activities of the District. This regulation establishes emissions fees, permit fees, ~~the procedures for permit renewal,~~ and additional program fees.

SECTION 1 Title V Emissions Fees

- 1.1 Applicability. Annual emissions fees are required from all major sources ~~defined in Regulation 2.16 Title V Operating Permits that are~~ subject to the operating permit requirements of Regulation 2.16 ~~Title V Operating Permits and all stationary sources for which an administratively complete operating permit application pursuant to Regulation 2.16 has been submitted to the District.~~
- 1.2 Except as provided in section 1.3 or 1.4, emissions fees shall be calculated based ~~upon~~ the actual emissions from the stationary source for the calendar year preceding the start of the fiscal year in which the fee is due. For Fiscal Year (FY) 2010 (July 1, 2009, through June 30, 2010), emissions fees shall be calculated by multiplying the total of all the single

pollutant actual emissions in tons per year (tpy) for calendar year 2008 by the fee rate of \$48.12 per ton. For each fiscal year after FY 2010, emissions fees shall be calculated by multiplying the total of all the single pollutant actual emissions in tpy for the calendar year preceding the start of the fiscal year by the product of (1) the fee rate for the previous fiscal year and (2) the sum of 1 plus the fractional change in the annual Consumer Price Index (CPI) as most recently published by the EPA, available at www.epa.gov/air/oaqps/permits/fees.html.

- 1.3 The total annual emissions fee shall be the sum of the single pollutant fees except that:
 - 1.3.1 No pollutant shall be counted in more than one single pollutant category,
 - 1.3.2 No more than 4,000 tpy of the actual emissions of a single pollutant shall be counted toward the total emissions of a stationary source, and
 - 1.3.3 Carbon monoxide emissions shall not be counted toward the total emissions.
- 1.4 Emissions statements are required to be submitted annually in accordance with Regulation 1.06 *Source Self-Monitoring and Reporting*. If data for the preceding year are not submitted, the District shall determine the fees based on potential to emit.
- 1.5 Payment of annual emissions fees is due within 45 days of the billing date. The District may approve an installment schedule of payments to be made not more frequently than quarterly.
- 1.6 Failure to pay emissions fees when due is a violation of District regulations. This failure is subject to penalties and an increase in the fee of an additional 5% per month up to a maximum of 25% **over** **of** the original amount due. In addition, failure to pay emissions fees within 60 days of the due date shall automatically suspend the stationary source's

permits to operate until the fees are paid or the District has approved a payment schedule in writing.

SECTION 2 Permit Fees

2.1 The permit fees listed in **this** Section 2 shall apply to Fiscal Year 2010 (July 1, 2009, to June 30, 2010).

2.2 Permit fees shall be calculated by multiplying the applicable permit fee for the previous fiscal year by the sum of 1 plus the fractional change in the CPI (as used in section 1.2 **for calculating the Title V emissions fee rate**), rounded to the nearest dollar. The District shall make available, at the beginning of each fiscal year, a list of the permit fees applicable to that fiscal year.

2.3 The fiscal year used for determining the applicable permit fee is as follows:

2.3.1 For construction permits, permit transfers, and asbestos demolition/renovation permits, the fiscal year in which the permit is issued,

2.3.2 For first-issue minor source operating permits, the fiscal year in which the construction permit expires and is not renewed pursuant to section 2.5.3,

2.3.4 For first-issue **FEDOOP** **federally enforceable District-origin operating** permits **(FEDOOPs)**, the fiscal year in which the FEDOOP **permit** is issued,
and

2.3.5 For renewal operating permits, the fiscal year in which the previous operating permit expires.

2.4 Permit fees (except permit transfers and asbestos demolition/renovation permits) shall be based **up** on the pollutant that has the largest potential to emit and are on a per permit basis.

2.4.1 Construction permits **fees** are based on potential to emit for the total project.

2.4.2 Operating permits **fees** are based on **the** potential to emit for the entire stationary source.
